

Your Google Cloud Product Manager Learning Path

Role overview:

Google Cloud Product Managers understand and promote the acceptance of the GCP. They are able to communicate effectively and convince on the basis of business-relevant use cases and analysis results.

The path should guide learners to achieve the following:

Google Cloud Fundamentals
Introduction to important GCP concepts and terminology

Business Transformation
Understand applications of Google's cloud technology for business improvement opportunities and transformational projects.

Essential Cloud Infrastructure
Developed understanding of essential cloud infrastructure: Foundations, core services and scaling and automation
