

# Your Business Analyst Learning Path

## Role Overview:

Acts as the link between business stakeholders and more technically oriented roles. Needs to understand technology and data analysis, but focuses on ensuring business needs are met.

## The path should guide learners to achieve the following:

### Mathematics & Statistics

Basic understanding of mathematics and statistics

### Data Management

Understand how data is managed and processed (at an intermediate level)

### Presenting Data

Advanced ability to present information in impactful ways (on management level with mainly structured data)

Good storytelling, creativity and problem solving skills

### Problem Solving
